

NOTE: This breadboard is not identical, but works for our purposes.

NOTE: We use Arduino Uno R4, but DigiKey's Schemelt does not have that component. This is the only Arduino board they have, and it's pins are practically identical to the Uno R4.

- Pins:
- Yaw Servo PWM (9)
 - Pitch Servo PWM (8)
 - Joystick X (A0)
 - Joystick Y (A1)
 - Joystick Switch (7, unused)
